Anger as authority proposes slashing Murray-Darling's reserved water: It has been clear to all involved that MDBA v2011 has little intention to continue in its role of independent guardian of the river system: the leaked Draft Plan merely confirms this fact: The Sydney Morning Herald, 19th November 2011: [ARTICLE HERE]

-

Science should drive water reform: expert: Wentworth Group scientist voices concerns that the Basin Plan will be based on political opportunism rather than hard science: 9News Online, 27th September 2011: [ARTICLE HERE]

-

Foreigners have a stake in 11 per cent of farmland: It is the statistics on water ownership that stand out: the process of water reform has opened the door to investment in this essential natural resource, and already nearly 10% of agricultural water entitlements are at least partly-owned by foreign investors: The Sydney Morning Herald, 10th September 2011: [ARTICLE HERE]

- Fight for water: An alliance of health and social working organisations is pressing the Federal Government to provide 4000 GI environmental water for the Murray-Darling basin flows: Country News, 29th August 2011: [ARTICLE HERE]

- Irrigators say desal deal highlights city-country double standards: Desalination plants continue to be used by our elected reps as a means of avoiding meaningful action on the MD issue; and now the irrigation lobby is also using them - in an attempt to promote a schism between metropolitan and regional Australians: The Stock Journal: 8th August 2011: [ARTICLE HERE]

- Murray-Darling: Keep the polities away: The House of Reps Regional Australia committee's report on the Murray-Darling Basin Plan is a showcase example of why politicians shouldn't be let near serious policy making: Crikey, 3rd June 2011: [ARTICLE HERE]

- Greens and farmers fight mining land grab: At last a glimmer of environmental and social responsibility from the Murdoch press: The Australian: 28th May 2011: [ARTICLE HERE]

-

Key scientists cast doubt on Murray water return: As many of us feared, it appears that MDBA (version 2011) is about to renege on its statutory responsibility to manage the Murray-Darling in the national interest, and is now merely a mouth-piece for those who seek to continue to over-exploit the environment and waters of the river system: The Age: 21st May 2011: [ARTICLE HERE]

-

Australia Builds Desalination Plants and Pipelines to Bring Water to Mines: Further confirmation, if any were required, that the Australian taxpayer is continuing to fund infrastructure projects demanded by the mining industry - to the benefit of the multinationals and their shareholders, and the detriment of the environment: Circle of Blue: 5th April 2011: [ARTICLE HERE]

-

Bluewashing: Why the claims of the bottled water industry do not hold water: [ARTICLE HERE]

- Money woes threaten Adelaide's desal plant: The company building the Adelaide desalination plant which South Australians do not want or need, but for which they will pay dearly for many years to come, is now threatening to sue taxpayers for loss of profit: Adelaide Now: 12th February 2011: [ARTICLE HERE]

- The Campaign of Manila's Water Vigilance Network against Suez and What You Can Do: An article from 2003 detailing major problems, including deaths from consumption of cholera contaminated water, which arose subsequent to French water privateer, Suez, taking control of Manila's water supply. Suez is a partner in a consortium that has just won a contract to manage water supplies to 1.1 million people in South Australia: Water Justice: 14th November 2003: [ARTICLE HERE]

- When tap water catches fire: A documentary from the USA exposes systemic corporate cover-up surrounding the wide-scale contamination of public water supplies as a result of coal-seam gas mining. Australians risk a similar outcome as the Murray-Darling Basin is currently being mined using the same techniques: GasLand - Australia: November 2010: [ARTICLE HERE]

Easy solutions for Murray-Darling have run dry: Decades of sound science show the future of the Murray-Darling Basin depends upon water cuts: ABC Science:14th October 2010: [ARTICLE HERE]

-

Watch Out: The World Bank Is Quietly Funding a Massive Corporate Water Grab: Despite the failure of privatisation initiatives worldwide, the World Bank has just given \$139 million to a subsidiary of Veolia to assist it in its efforts to privatise water in Eastern Europe: Alternet, 2nd November 2010:[ARTICLE HERE]

-

Water bills to double again:

To pay for the desalination plant, north-south pipeline and other works to boost Melbourne's water supply, the commission has approved price rises that will push a typical household bill for South East Water from \$566 in 2008-2009 to \$894 in 2013: The Age, 31st October 2010: [ARTICLE HERE]

- Guide to the proposed Basin Plan: An encouraging document, but note it is merely a guide to a proposal - a long way from legislation: Murray-Darling Basin Authority website, 8th October 2010: [GUIDE HERE]

- The desal cup runneth over with cash: Victorian desal plant will in effect cost taxpayers \$1.1 billion per year to run - and provide unnecessary water!: The Age, 27th September 2010: [ARTICLE HERE]

- Who owns Australia's water?: Comments from Constitutional lawyer, George Williams (scroll down to second item on the page) confirm our concerns that the Constitution does not afford adequate protection: ABC Rural Report for SE NSW, 24th September 2010: [ARTICLE HERE]
- Industry sales bad news for bottled water, good news for the planet: US consumers are starting to reject bottled water as a largely unnecessary and polluting product - surely Australians can do likewise: Food & Water Watch, September 2010: [ARTICLE HERE]
- Drinking Rainwater: A Double-Blinded, Randomized Controlled Study of Water Treatment Filters and Gastroenteritis
Incidence: extensive Adelaide study confirms no appreciable health risk associated with the consumption of untreated rainwater: American Journal of Public Health, 19th August 2010: [ABSTRACT HERE]
- Our water interests sold down the river: Following on from the news, first broken by Fair Water Use, that Murray-Darling water is being touted for overseas sale: The Drum, ABC On-line, 10th September 2010: [ARTICLE HERE]
- Suez seeks \$1.2bn in damages in Argentina: The danger of doing business with water privateers: Global Water Intelligence, August 2010: [ARTICLE HERE]
- Italy: Water is not for sale: Recent legislation to privatise water services in Italy has met with staunch public resistance and a well-organised national campaign, resulting in the tabling of a petition of around 1.5 million signatures from citizens opposed to this legislation - three times as many as are required to call a referendum on the issue: Public Services International website: September 2010: [ARTICLE HERE]
- Thirsty foreigners soak up scarce water rights: Further confirmation that the media is waking up to the fact that Australian "water reform" equates to privatisation: The Brisbane Times: 4th September 2010: [ARTICLE HERE]
- Liquid gold: The implications of the surreptitious privatisation of Australia's water are at last registering on the national radar. Fair Water Use continues to question the constitutionality of the water reform process: The Sydney Morning Herald: 4th September 2010: [ARTICLE HERE]
- Causeway Asset Management - Water Investment Strategy: newly-published document, confirming Causeway's predatory plans for the water of the Murray-Darling river system: Causeway Asset Management website: 2nd September 2010: [ARTICLE HERE]
- Murray-Darling water investment: the managing director of Causeway Water Ltd, a new company formed to speculate on Murray-Darling water, responds to FWU's media disclosure: The Weekly Times: 2nd September 2010: [ARTICLE HERE]
- Water experts slam easing of water restrictions as "political opportunism": Comments from Fair Water Use and Environment Victoria: Crikey: 30th August 2010: [ARTICLE HERE]
- Brumby's giant money pit: \$5.7 billion and rising: the Wonthaggi desal plant is now an increasingly heavy albatross around the neck of the Victorian Premier: The Age: 28th August 2010: [ARTICLE HERE]
- Aussie water rights investor seeks A\$100m: As revealed by FWU. This development should be of great concern as the company has been established with the single aim of speculating on Murray-Darling water: Global Water Intelligence: August 2010: [ARTICLE HERE]
- Queensland floodwaters won't reach Murray mouth: As feared by Fair Water Use, despite initially optimistic forecasts from governments and Basin administrators, the reality is that, as a result of the combination of long term drought and rampant over-harvesting of water in the upper Darling catchment, recent record rainfall in the region will result in little or no nett benefit to the river system as a whole: ABC Rural On-line: 28th May 2010: [ARTICLE HERE]

- Case for water equity investing 2010: this article, from an investment company with significant involvement in Murray-Darling water, makes fascinating if disturbing reading. Better the devil you know: Summit Global Management, 2010: (ARTICLE HERE)

- Jordan River could die by next year: The Murray-Darling is only one of the world's major river systems facing collapse as a result of inept management and over-exploitation: ABC News, 3rd May 2010: (ARTICLE HERE)

- Measuring the performance of Australian water utilities: The National Water Commission is an independent statutory body within the Department of the Environment, Water, Heritage and the Arts; its role being "to drive progress towards the sustainable management and use of Australia's water resources". Why then, despite mounting evidence that rampant infrastructure development, and especially the construction of desalination plants, is no solution to the water crisis, does this latest NWC report laud the outlay of vast sums to this end? National Water Commission, 28th April 2010: (ARTICLE HERE)

- Desalination's eco-damage studied: Australian governments have been massaged by multinational water privateers into believing that desalination has an important role to play in the nation's water future. Latest evidence from overseas confirms the errant stupidity of such an approach: ZAWYA, 26th April 2010: (ARTICLE HERE)

- Economics of water reform in the Murray-Darling Basin: excellent paper out of the ANU which defines the processes whereby the Commonwealth can improve environmental outcomes whilst allowing irrigators to adapt to reduced water availability: Centre For Water Economics, Environment and Policy, ANU, 15th February 2010: (ARTICLE HERE)

- Water deal details fudged: The impacts of the de-facto privatisation of Australia's water. FWU details some of its concerns: The Independent, 15th January 2010: [ARTICLE HERE]
